

INDUSTRIAL CIRCULATION TANK ENGINE HEATER

Industrial circulation tank heaters provide dependable engine starts in all temperatures by circulating warmed coolant through the engine.

BENEFITS

- Provides a quick start
- Reduces time to reach operating speed
- Enhances immediate full-load acceptance
- Corrosion and impact resistance
- Withstands overheat conditions
- CSA & NRTL/C approved to Canadian and U.S. standards

WHERE TO USE

- Power gen or genset applications

WATER RESISTANT
TERMINAL END CAP

FEATURES

- Rugged die cast, one-piece, aluminum construction
- Low watt, density copper heating element
- Temperature sensing thermostat with automatic reset
- Water resistant terminal end cap
- Flame retardant, permanently connected, 5 ft. (1.52M) power cord
- Available in 120, 240 and 230 volts
- Three heat ranges:
 - 60-80°F (10-27°C)
 - 80-100°F (27-38°C)
 - 100-120°F (38-49°C)
- Environmentally friendly materials such as recyclable aluminum, plastic and copper
- 750W-1500W with a 5/8" hose connections and 1500W – 2250W with a 3/4" hose connections
